

# BFS

*BLUE FORCE SERVICES*

## CAPABILITIES

# An Integrated Solutions Provider

Blue Force Services (BFS) provides integrated solutions in a number of technical disciplines

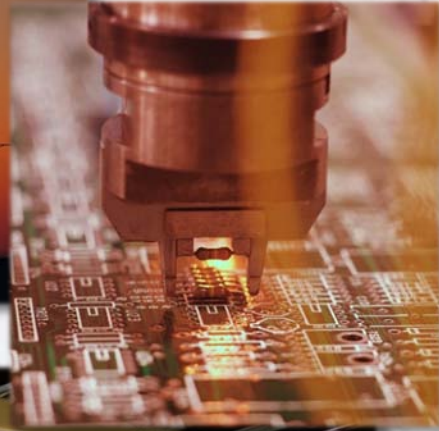

- Technical Documentation and Training Support
- Engineering Support Services
- Integrated Logistics Support Services
- Aircraft and Avionics Maintenance Support
- Technical Staffing  
(Engineering and Information Technology)
- Program Management Services
- Marketing and Creative Design

# About Blue Force Services

- A Nationally recognized Supplier and Employer, with locations across North America
- Financially stable private company
- GSA Approved Contractor

## Markets Served

- U.S. Federal Government
- Military Defense Systems
- State Governments
- Aerospace
- Automotive
- Commercial Marine
- Pleasure Marine
- Engine & Sub Systems
- Propulsion Systems
- Chemical
- Computer Hardware/Software
- Education
- Food Processing
- Manufacturing
- Mass Transportation
- Medical

# Certifications & Affiliations

- ISO 9001
- American Boat and Yacht Council
- National Marine Manufacturers Association
- Women's Business Enterprise
- Michigan Minority Business Development Council, Certified Minority Business Enterprise
- Virginia Minority Supplier Development Council
- Southern California Minority Business Development Council, Inc.
- Canadian Aboriginal and Minority Supplier Council

TECHNICAL SERVICES

# Technical Documentation Content Development

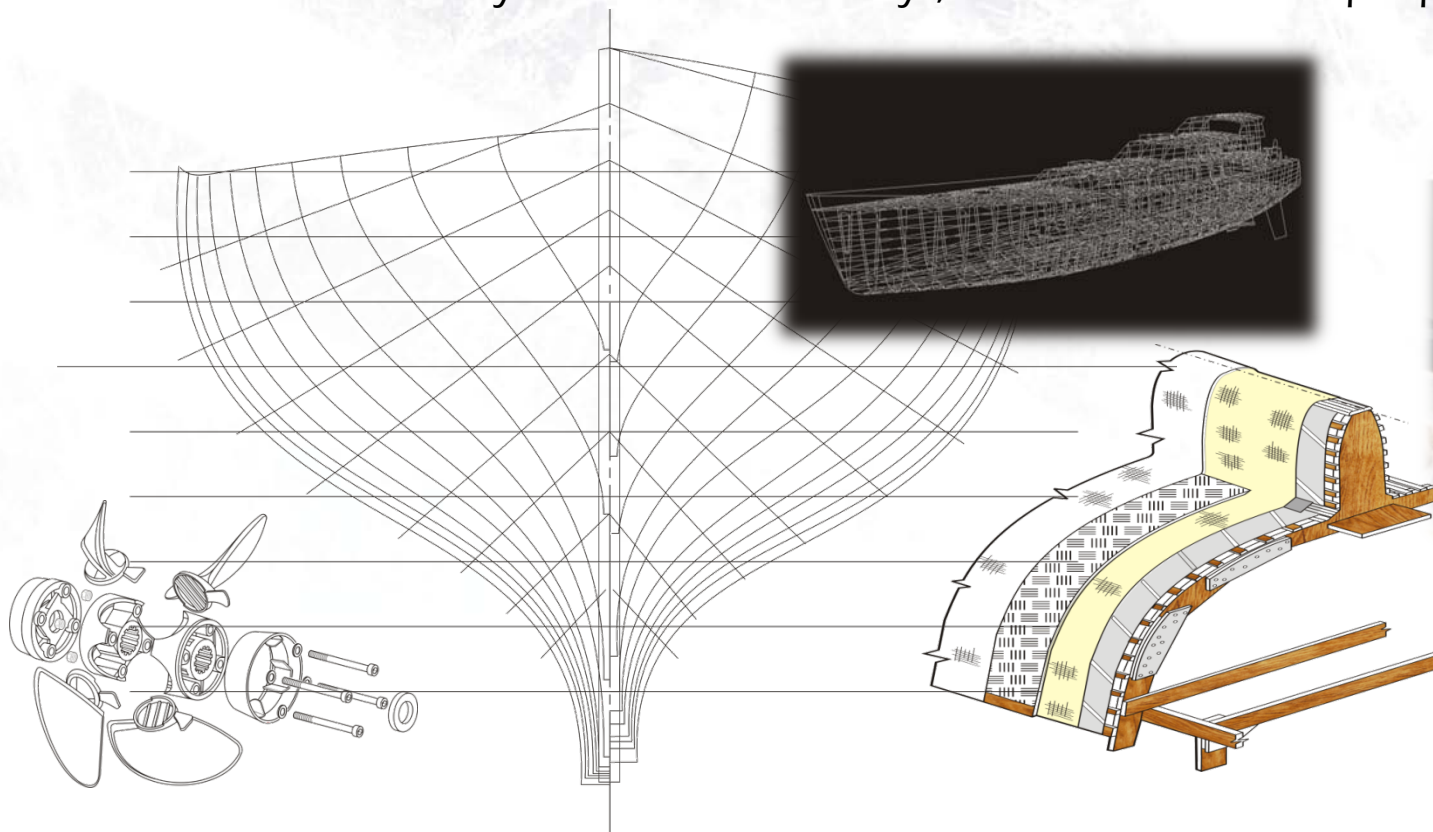

BFS has a team of highly-skilled technical writers, technical illustrators, editors, and project managers who allow us to provide services that encompass the entire technical publications spectrum, from printed materials to interactive electronic manuals (IETMs). Our range of experience includes:

- Installation Design Manual
- Installation Manual
- Laminate Schedules
- Maintenance Manual
- Maintenance Charts
- Safety Manual
- Ships Log
- Sub System Operating Instructions
- Operator's Manual
- Parts Manuals
- Technical Bulletins
- Standard Practices Manual

Our strong project management capitalizes on the industry experiences and specialized talents of each individual, while a diverse suite of publishing software and tools ensures seamless integration with customer engineering data and publications styles. BFS has the capability to support conversion and enrichment of legacy data for support of SGML and XML, and are able to produce state-of-the-art electronic publications.

# Engineering and Design

- Senior level engineers, designers, drafters, and detailers with extensive expertise in the marine industry and state-of-the-art technical capabilities are ready to embrace every aspect of any design, engineering, or support project
- Decades of experience and technologically advanced hardware and software allows projects to be properly and professionally executed, from concept to completion
- Direct experience in virtually every type of marine engineering project from runabouts to mega yachts, small outboards to high output turbine propulsion systems.
- BFS personnel have designed almost anything you can imagine, from complex automated assembly lines to children's toys, aircraft controls to hip replacements

# Training and Curriculum Development

- BFS provides our clients with exceptional training and curriculum development services, including implementation and operation of state-of-the-art training facilities
- Instructors and training teams have extensive industry experience and technical know-how to focus on human capabilities, interfaces, and limitations throughout the system lifecycle
- Training specialists are able to identify and create effective, targeted learning programs, on-site or via electronic media
- Training development staff has the knowledge needed to create, maintain, and deploy effective Computer Based Training (CBT) courses that are interactive and aesthetically pleasing while relaying all necessary information
- BFS manages the supplier's support capabilities to ensure field service representatives efficiently deploy training, either to end-users at point-of-need or to trainers in a controlled sustainment environment

# BFS

*BLUE FORCE SERVICES*

## SUMMARY

# Commitment to Excellence in Service

BFS has the ability to provide turnkey solutions, for the marine industry, from concept to delivery. Our expert-level knowledge of design, manufacture, propulsion, and vessel systems, along with our proven Quality process (ISO 9001 Certified), allows us to handle multiple complex programs and projects. A hands-on management style with the flexibility to adapt to client requirements makes us an invaluable asset to our customers.

# Contract Opportunities

- Technical Documentation
- Distribution Channel Support
- Technical and Professional Staff Augmentation
- Systems and Database Administration
- Integrated Logistic Support Services
- Reverse Engineering
- Design Engineering Support  
(11 CAD/Parametric Platforms)
- Training Support
